WORK EXPERIENCE

SniperThink

Remote

Full-Stack Developer Intern

Apr 2025 – Jun 2025

- Implemented a scalable PostgreSQL backend with an input layer to capture live sales metrics including quantity and revenue streams, supporting a 35% boost in data processing speed while maintaining system integrity through Git version control for seamless collaborative development.
- Designed and implemented a comprehensive role-based authentication system utilizing Node.js and Express.js, enhancing security protocols for over 300 users across buyer, seller, employee, and support agent roles, resulting in improved access control compliance by 40%.
- Developed and integrated user-plan logic to enforce purchase-based access limits—such as a 50-user cap—ensuring compliance with licensing agreements while supporting scalability for future growth.

PROJECT EXPERIENCE

FrozenLeads

Remote

Developer

May 2025 – Present

- Developed an automated email-status scanner that identifies **frozen (ghosted) leads** by analyzing Gmail threads via the Gmail API, reducing manual thread checks by an estimated **90% approximately 8 hours per week**.
- Implemented a **cron-based scheduler** running every 10 minutes to update lead statuses (sent, replied, ghosted), saving users an estimated **5 hours/week** compared to manual follow-ups.
- Designed and connected a Mongoose schema to log the **last sent message**, subject, and body—improving data accuracy and cutting lookup time by **75%**.
- Secured Gmail access with an **OAuth 2.0 PKCE flow**, automating token refreshes to ensure uninterrupted background syncing and eliminating support tickets for expired tokens.

SKILLS & INTERESTS

Skills: Language (JavaScript, Python, Java)

Frontend (React.js, Redux, React Route, HTML5, CSS3, Tailwind)

Backend (Express.js, MongoDB, JWT, Mongoose, REST APIs)

Databases (MongoDB)

APIs & Integrations (Gmail API, Axios, Fetch API)

Dev Tools (Git, Postman, VS Code, Cron Jobs)

Web Fundamentals (JSON, Cookie/Session Management, Task Scheduling, Async Programming)

HACKATHONS

- **VerdictoBot (AI Legal Chatbot)**
 - Developed an AI-powered chatbot using JavaScript, React and Python to assist users with legal queries through a conversational interface; focused on accessibility and simplifying legal information for people.
- **Laundry Landing Page – CodeBite 2K23 (Web Dev Hackathon)**
 - Designed and built a fully responsive, animated landing page using HTML, CSS, JavaScript, and GSAP for a fictional laundry service; showcased creative UI/UX and smooth scroll-based animations

EDUCATION

Lakshmi Narayan College of Technology University

Bhopal, Madhya Pradesh

Bachelor of Technology ([B.Tech](#)) in Artificial Intelligence and Machine Learning

Graduation Date: Jul 2026
